

Leptron Drone Services

- ✓ We Fly
- ✓ We Process
- ✓ We Deliver

Since 2006, Leptron Unmanned Aircraft Systems, Inc. has been utilizing sUAS (small-unmanned aircraft system) technology to collect videography, photography, and remote sensor data as a professional service. The services we offer provide an aerial perspective tailored to your needs. Collectively, our team offers decades of manned and unmanned aviation experience.

WHY CHOOSE LEPTRON?

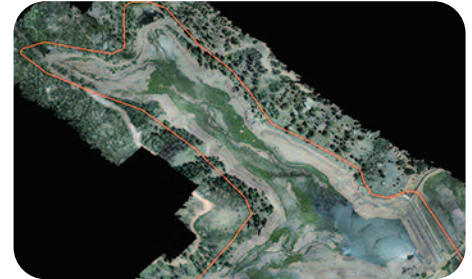

- FAA Approved
- Fully Insured
- Flying Commercial-grade sUAS Technology
- Industry Specific Remote Sensors
- Experienced Manned & Unmanned Pilots

Real Estate – Industrial – Utilities – Towers – Vegetation Management – Events

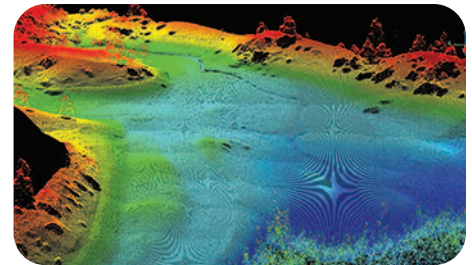

Our certified and experienced UAV pilots manage the process from end-to-end. Many of the processes involved with data processing is now automated which reduces time and expense. At sub-centimeter pixel resolution, Leptron leads the industry in precision.

HOW IT WORKS

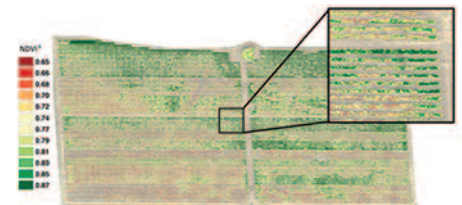

- We help you develop the work scope
- We build the flight plan
- We collect aerial data
- We process and analyze the data
- We deliver the data

Orthomosaics (2D)

Photogrammetry (3D)

Vegetation Index (NDVI)
